

I'm sending this to inform you of the benefits from listening to XM Satellite Radio and its traffic and weather channels. I travel constantly and although the region I travel in doesn't change I am constantly dealing with unpredictable traffic delays and pore weather. XM provides instant information 24/7 no other radio service does this. Satellite radio provides variety and quality that are not available elsewhere. While I travel XM radio has also been a total relief from constant advertising broadcasted by other stations. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I'm permitted to hear or forced to hear!

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.

Thank you for your consideration.
